

WipeDrive Mobile Volume is the most advanced product on the market, designed for processing large volumes of mobile devices. It consists of three integrated services and reporting with flexible integration options and APIs.

Diagnostics

Automatic and extensive mobile device testing, including device grading with minimum human interaction; 2-3 minutes per device.

Reporting

is a web reporting tool that shows real-time statistics. It can be used for monitoring and business follow-up. Audit trail of data collection and its use.

Verify

checks for device locks and verifies against GSMA's Global Blacklist Registry for stolen devices before they can enter your pipeline to increase buyback profit.

Eraser

Permanent erasure of all the sensitive user content. Up to thirty two (32) phones or tablets can be simultaneously erased.

Why WipeDrive Mob Volume?

- ✓ Cost efficiency and performance: Product and process efficiency with minimum labour costs
- ✓ 100% certified content erasure: Certified mobile content erasure product guarantees data security
- ✓ Regulation compliancy: Built-in EU General Data Protection Regulation (EU GDPR) by Design and by Default
- ✓ Automatic updates: No service breaks
- ✓ ADISA Certified
- ✓ Key characteristics: speed, reliability, quality, simplicity, and versatility
- ✓ Cloud reporting and management: Unique scaling from single installation to multisite and multinational environments
- ✓ Integration to business servers
- ✓ Reporting customization with customer branding
- ✓ Proactive customer support based on automated troubleshooting
